We envision a world in which every founder has the power to build, improve, and scale software with the same speed and intelligence as the world's top tech teams.

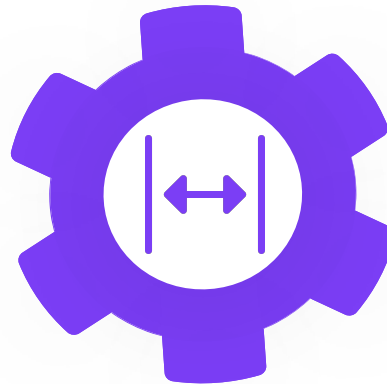

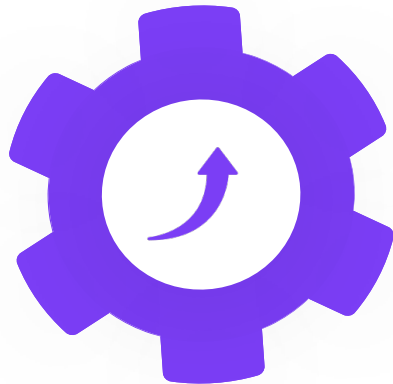

WHY NOW?

The Software Industry Is Entering the AI-Driven Scaling Era

A Rapid Industry Shift

AI development tools have exploded since 2022, reshaping how software is built.

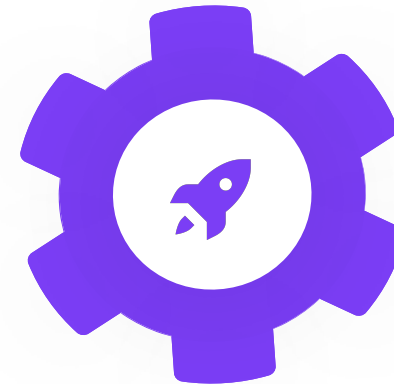

The Scaling Gap

80% of startups stall after MVP — progress slows, costs rise, and teams fail to scale.

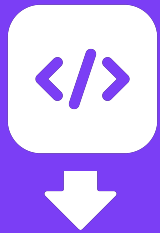

Scaleward's Moment

Launched in August 2025 to capture this transition and lead the post-MVP growth wave.

PROBLEM

After Launching an MVP, Most Founders Hit a Wall — Progress Slows, Costs Rise, and Quality Drops.

Development Slows Down

After the MVP, product updates take longer — teams lose agility, and innovation stalls.

Costs Rise Quickly

Scaling requires more developers, management, and QA — burning runway before real growth begins.

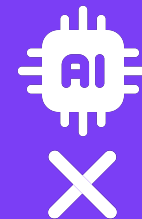

Quality Declines

With speed and cost pressures, bugs multiply, performance drops, and user experience suffers.

Teams Are Unreliable

Freelancers are inconsistent, offshore teams lack quality, U.S. teams are too expensive.

AI Tools Fall Short

AI can build prototypes, but not scalable, production-grade products that evolve.

SOLUTION

Scaleward.ai - AI Development Team That Never Stops Learning

Proven Efficiency

3x faster delivery, 50% lower cost, and a 99% project success rate — redefining post-MVP software growth.

Natural Language Requests

Founders describe what they need in plain English — Scaleward's AI analyzes, plans, and executes seamlessly.

Transparent Results Dashboard

Every task, estimate, and outcome is tracked live — delivering full visibility, accountability, and performance insights.

Hybrid AI + Human System

Automates coding, QA, and scaling with expert oversight.

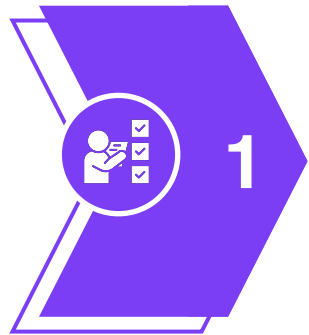

Continuous Development Cycle

No more waiting for sprints or rebuilds. The system continuously builds, tests, and improves software in real time.

HOW IT WORKS

From Request to Deployment — All in One Smart Flow

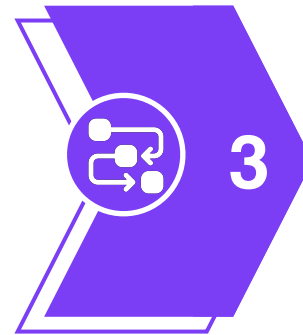

Onboard Project

AI auto-configures your workspace and audits your codebase for insights.

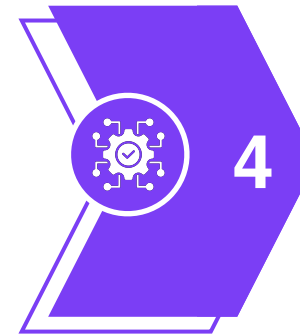

Submit Request

Founders describe what they need in plain English — features, fixes, or updates.

AI Plans & Estimates

Scaleward's AI analyzes the task, estimates credits, and generates a build plan.

AI Development & QA

tests, and reviews with human oversight for precision.

Deploy & Track

Updates are deployed automatically and tracked live via a real-time dashboard.

TRACTION

Early Results Prove Scaleward's Speed, Efficiency, and Market Fit

3x Faster, 50% cheaper

more cost-efficient than traditional software agencies — validated by early adopters.

1 VC Committed

VC partner committed to adopting Scaleward as the go-to dev platform for portfolio startups

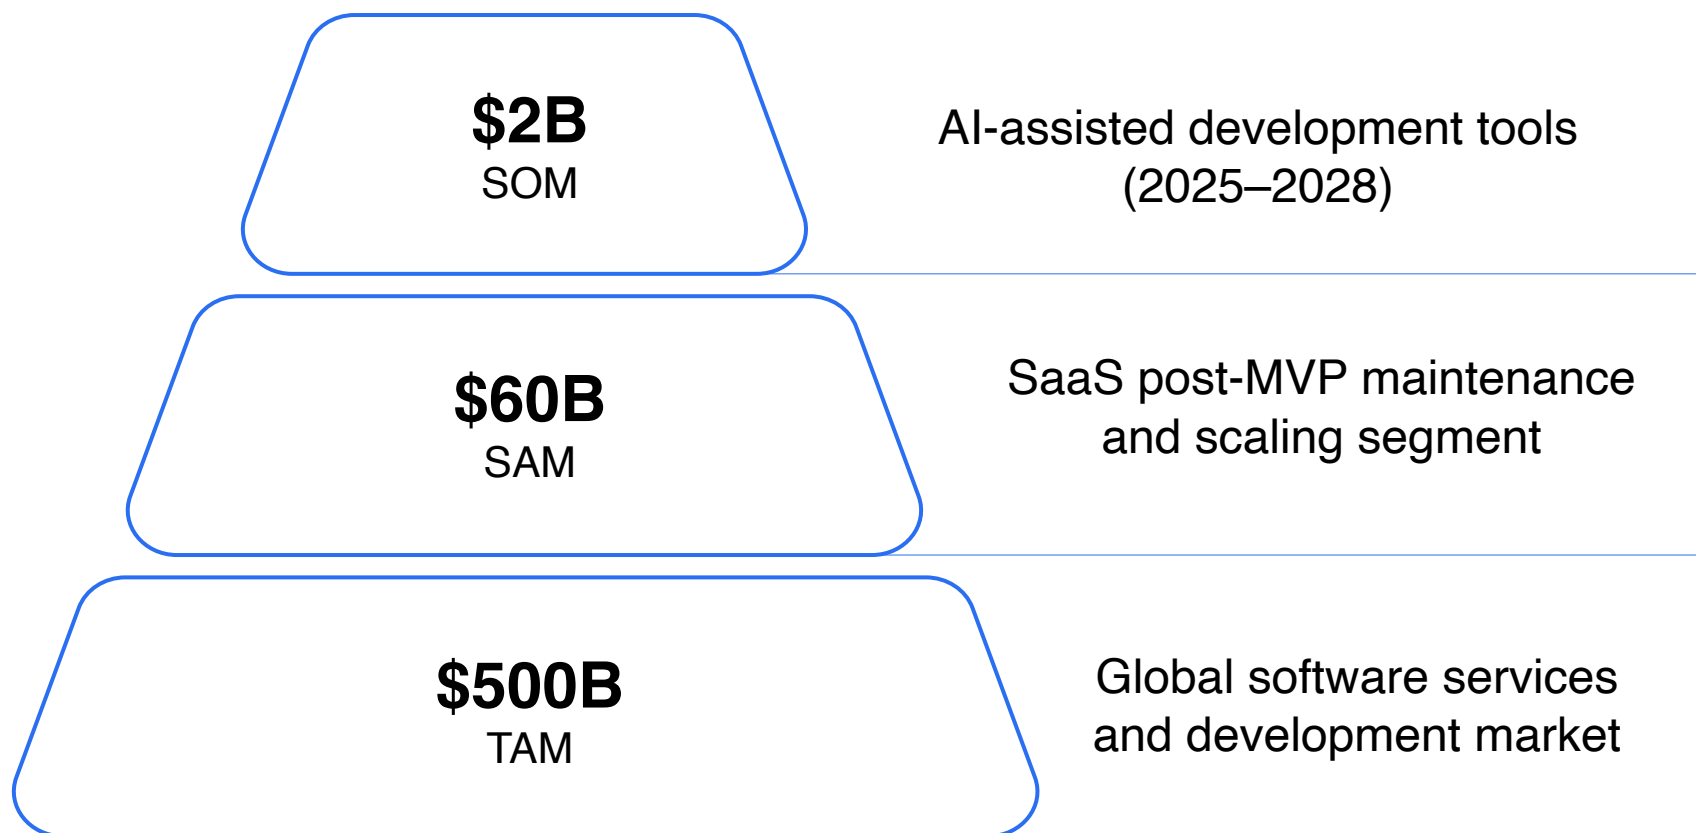

90% success rate

5 start up clients onboarded and deploying production updates, using Scaleward.

MAREKT OPPORTUNITY

A \$500B+ Market Ready for AI-Driven Software Scaling

BUSINESS MODEL

Credit-Based SaaS Model Offering Predictable Costs and Transparent Results for Continuous Software Scaling

Starter

500\$/month

- ✓ 5 credits included
- ✓ Ideal for bug fixes or small feature tweaks
- ✓ ~1 credit used per week

Growth

2.7k\$/month

- ✓ 30 credits included
- ✓ Designed for regular updates and product maintenance
- ✓ ~5 credits used per week

Scale

8k\$/month

- ✓ 50 credits included
- ✓ Built for rapid multi-feature delivery
- ✓ ~15 credits used per week

Enterprise

15k\$/month

- ✓ 250 credits included
- ✓ Full product management and 24/7 support
- ✓ ~45 credits used per week

Optional extra credits available for **\$60–\$100 each**

TEAM

Seasoned AI Builders Transforming How Founders Build and Scale Software Globally

Sheila Nasehi, Ph.D
Founder & CEO

AI specialist (PhD, 2014), former CTO at Angelink — scaled to 150K users and \$10M+ transactions. Recognized advocate for Women in AI.

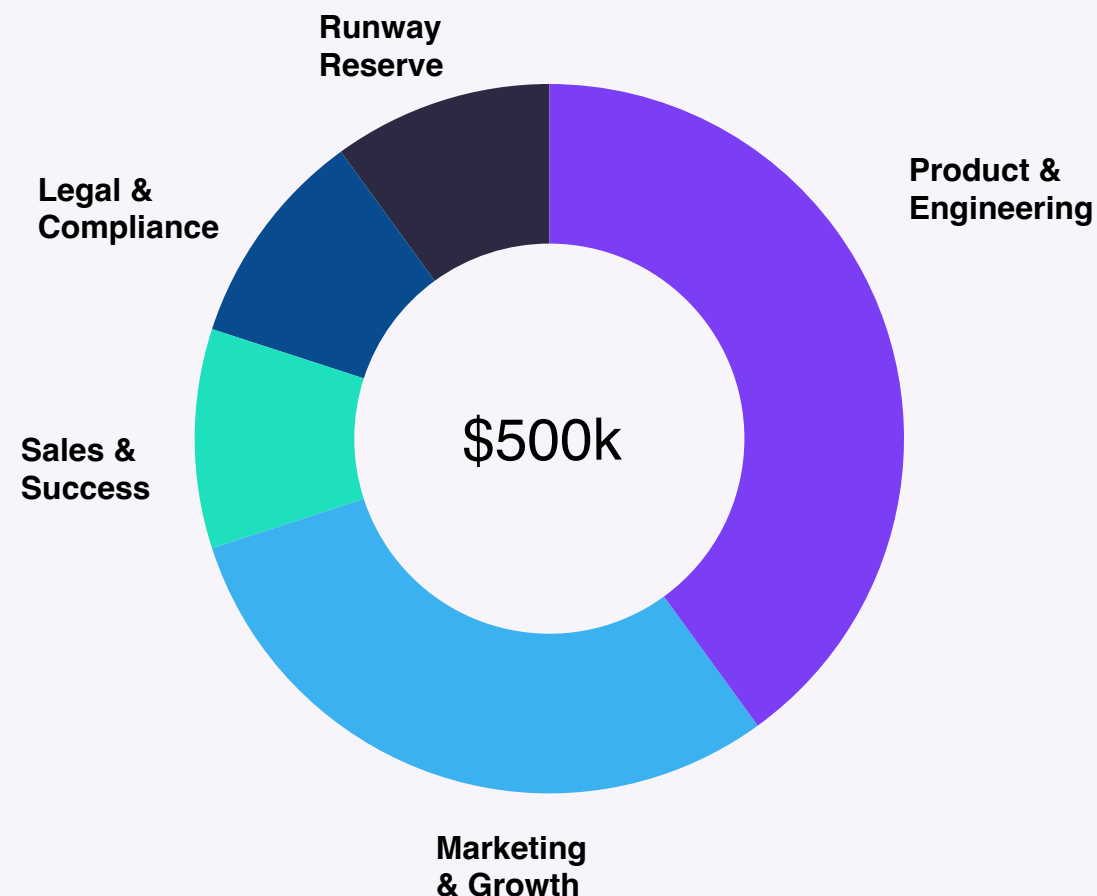

Amir Nasehi
Co-Founder & Head of Engineering

8+ years in software architecture and SaaS scaling. Built multiple enterprise systems serving global clients.

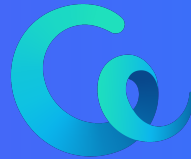

ASK

\$500K Pre-Seed to Accelerate AI Automation and Market Adoption

| | |
|------------|--|
| Round | Pre-Seed |
| Amount | \$500,000 |
| Valuation | \$4.5M pre-money |
| Target | \$1.8M–\$2.4M ARR within 14 months post-raise |
| Next Round | Positioning for \$3–\$5M Seed/Series A in 2027 |

Thank You.
